

Dokumentasi API QORI WMS

Dokumentasi ini menjelaskan penggunaan REST API QORI Warehouse Management System (WMS) yang dibangun menggunakan library php-crud-api. API ini bersifat CRUD otomatis berdasarkan struktur tabel database.

1. Informasi Umum

- API Engine: php-crud-api
- Format Data: JSON
- Protocol: HTTP / HTTPS
- Authentication: Tidak ada (public)
- Base URL: <http://www.qori-wms.biz.id/php-crud-api/api.php>

2. Struktur Endpoint Dasar

Setiap tabel database otomatis menjadi endpoint API dengan format:
/records/{nama_tabel}

Contoh:

/records/customers

/records/products

/records/orders

3. Daftar Tabel & Endpoint

No	Nama Tabel	Endpoint
1	Customers	/records/customers
2	Employees	/records/employees
3	employee_privileges	/records/employee_privileges
4	inventory_transaction_types	/records/inventory_transaction_types
5	inventory_transactions	/records/inventory_transactions
6	Invoices	/records/invoices
7	order_details	/records/order_details
8	order_details_status	/records/order_details_status
9	Orders	/records/orders
10	orders_status	/records/orders_status

11	orders_tax_status	/records/orders_tax_status
12	Privileges	/records/privileges
13	Products	/records/products
14	purchase_order_details	/records/purchase_order_details
15	purchase_order_status	/records/purchase_order_status
16	purchase_orders	/records/purchase_orders
17	sales_reports	/records/sales_reports
18	Shippers	/records/shippers
19	Strings	/records/strings
20	Suppliers	/records/suppliers
21	Users	/records/users

4. Operasi CRUD

GET – Ambil Data

POST – Tambah Data

PUT – Update Data

DELETE – Hapus Data

5. Filtering & Query Parameter

1. Filter: /records/products?filter=price,gt,10000
2. Sorting: /records/orders?order=date,desc
3. Pagination: /records/customers?page=1,20
4. Select Kolom: /records/products?include=id,name,price

6. Relasi Antar Tabel

php-crud-api mendukung relasi otomatis berdasarkan foreign key.

Contoh:

GET /records/orders?join=customers

7. Kode Status HTTP

Status	Keterangan
200	OK
201	Data berhasil dibuat

400	Request tidak valid
404	Data tidak ditemukan
500	Server error

8. Catatan Keamanan

- API saat ini tanpa autentikasi
- Disarankan menambahkan API Key atau JWT
- Gunakan HTTPS
- Batasi IP (whitelist)

9. Referensi

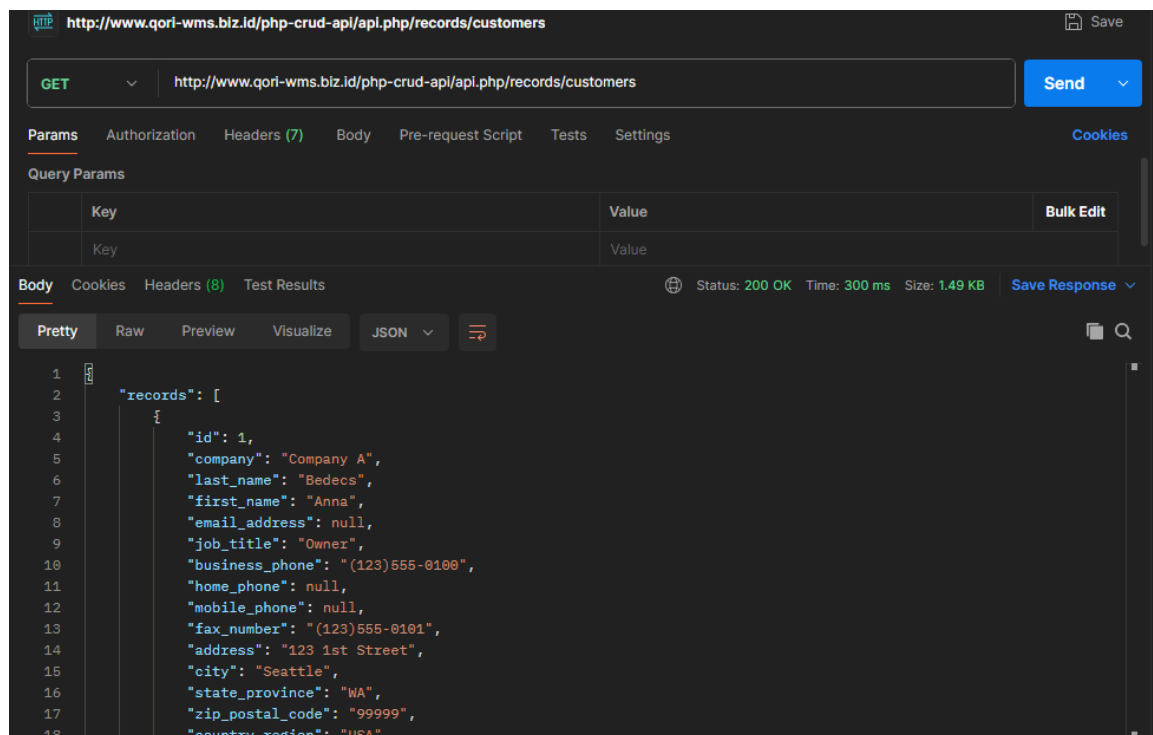

php-crud-api GitHub: <https://github.com/mevdschee/php-crud-api>

Contoh kita test API menggunakan POSTMAN

Kita menggunakan table customers

Get /records/customers

Result :

Menambahkan Data Customer

POST /records/customer

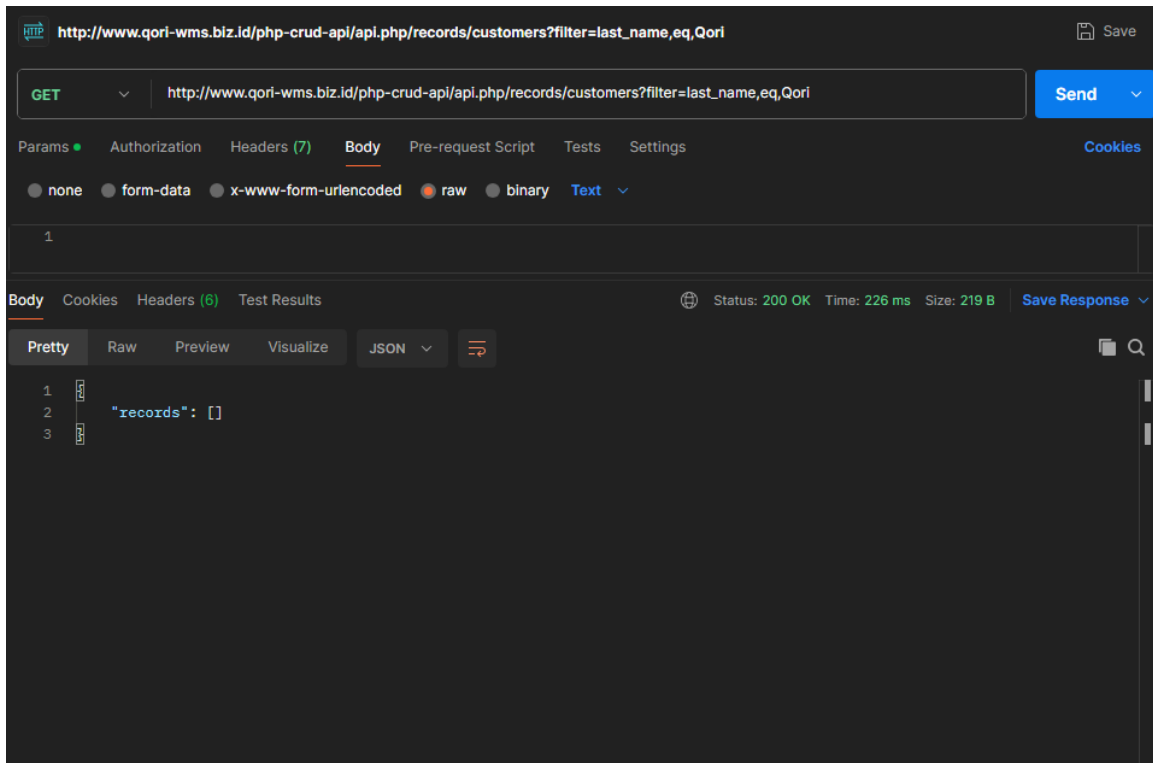

Saya akan menambahkan data ini

```
{  
  "company": "PT QORI", "fisrt_name": "Test", "last_name" : "Qori",  
  "email_address" : "Testing@testing.com", "job_title" : "Test"  
}
```

Before insert

url : http://www.qori-wms.biz.id/php-crud-api/api.php/records/customers?filter=last_name,eq,Qori

Method: GET

On Insert

url : <http://www.qori-wms.biz.id/php-crud-api/api.php/records/customers>

Method: POST

Body (json) :

```
{  
  "company": "PT QORI", "fisrt_name": "Test", "last_name" : "Qori",  
  "email_address" : "Testing@testing.com", "job_title" : "Test"  
}
```

Result :

The screenshot displays a REST client interface with the following details:

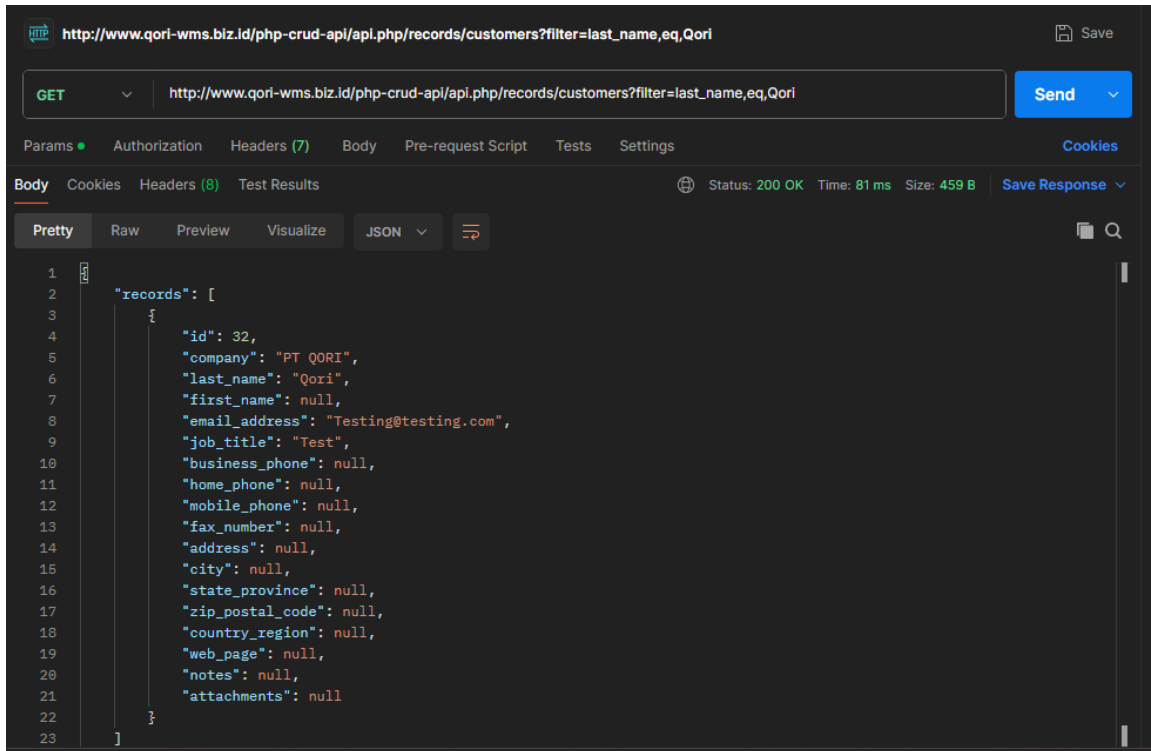

- URL:** <http://www.qori-wms.biz.id/php-crud-api/api.php/records/customers>
- Method:** POST
- Body:** A JSON object:

```
{  
  "company": "PT QORI", "fisrt_name": "Test", "last_name" : "Qori",  
  "email_address" : "Testing@testing.com", "job_title" : "Test"  
}
```
- Status:** 200 OK
- Time:** 63 ms
- Size:** 206 B
- Response:** The response body is empty, indicated by a single space character on line 1.

After Insert

url : http://www.qori-wms.biz.id/php-crud-api/api.php/records/customers?filter=last_name,eq,Qori

Method: GET

The screenshot shows a REST client interface with the following details:

- URL:** `http://www.qori-wms.biz.id/php-crud-api/api.php/records/customers?filter=last_name,eq,Qori`
- Method:** GET
- Status:** 200 OK
- Time:** 81 ms
- Size:** 459 B
- Response Body (JSON):**

```
1  {
2    "records": [
3      {
4        "id": 32,
5        "company": "PT QORI",
6        "last_name": "Qori",
7        "first_name": null,
8        "email_address": "Testing@testing.com",
9        "job_title": "Test",
10       "business_phone": null,
11       "home_phone": null,
12       "mobile_phone": null,
